

# Onyfix®

## Onyfix® Hard - Application Steps

Charge your Onylux® Blue LED Light prior to application

Roughen nail surface with diamond burr or disposable nail file

Degrease the nail using a disposable isopropyl alcohol wipe

Place one drop of Onyfix® Primer in the Onyfix® Primer lid

Use a cotton bud to spread the Onyfix® Primer on the nail

Use Onylux® Blue LED Light for 60 seconds to dry the Onyfix® Primer

Take 1mm of Onyfix® Hard composite using Onylux® spatula

Shape the Onyfix® Hard to form a strip that is 2mm in width and height

Use Onylux® Blue LED Light for 60 seconds to harden composite

Assess the Onyfix® strip to ensure even thickness along the entire strip

Use a ceramic burr or disposable nail file to smooth Onyfix® strip

Replace the Onyfix® strip when it reaches the distal 1/3 of the nail
